

Mesa Biological Indicators

Spore Strips and Culture Media

MagnaAmp® is a self-contained biological indicator ampoule for monitoring steam sterilization of liquids in containers or washer sterilizers. The MagnaAmp® biological indicator ampoules contains *Geobacillus stearothermophilus* spores and a specially-formulated culture medium that turns a dramatic yellow if spores grow.

The MagnaAmp® provides easy visual confirmation of sterilization within 48-hours, without the need for difficult and time-consuming laboratory work.

- 48-hour results
- Small (1ml), conveniently shaped ampoule
- Designed to sink in container
- Negative controls are included with each box of product
- No laboratory required
- Dramatic color change

Storage

Refrigerate at 2-8 °C.

Certification

MagnaAmp® biological indicators are traceable to a recognized culture collection and certified for population, D-value, z-value, F₀ value and performance.
