

PCD Directions for Use

PCD Directions for Use

1 Write appropriate cycle number and BI Location on PCD label.

2 Remove pressure sensitive adhesive release liner from back of PCD mounting card.

3 Affix PCD to the outside of an appropriate box in a specified load location.

4 After EO processing, remove all PCDs and return to Microbiology Laboratory.

5 Remove BI pouch and location ID label together by tearing off at perforation.

6 Peel the location ID label from the pouch and affix to a test tube of culture medium.

7 Using aseptic technique, cut the pouch open and remove Biological Indicator.

8 Place the Biological Indicator into the culture medium and incubate per standard procedure.
