Customer Letter Regarding Freight Forwarders 23 January 2017

Dear Valued Customer,

With the upcoming closure of the Omaha facility and subsequent manufacturing transition to our Bozeman facility, it is important to communicate future changes to shipments which are currently transported using a freight-forwarding company.

Our Mesa facility in Omaha previously had established relationships with the freight-forwarding companies on behalf of the customer meaning Mesa was billed and then that amount was billed to the customer. Moving forward, it will now be the responsibility of the customer to establish these types of relationships directly with the freight-forwarding companies.

If you are currently a customer who orders biological indicator products from our facility in Omaha and you frequently utilize a freight-forwarding company for shipments, please complete the process of establishing an account with such a company prior to the transition. Below is a list of freight-forwarding companies which have transported products from our Bozeman facility on behalf of our customers. You may choose to establish a relationship with one of these companies or one of your own choosing. Please ensure that the company regularly conducts business in Bozeman, Montana.
