

# MesaLabs

Dear Valued Customer,

12 June 2015

As all are likely aware, our Mesa Biological Indicator Company encompasses two manufacturing sites – one in Bozeman, MT (formerly SGM Biotech) and another in Omaha, NE (formerly Raven Laboratories). With similar product lines developed at each site and distributed, we have decided to consolidate two product lines.

A business decision was made to discontinue the ProAmp product line which is manufactured at our facility in Omaha and within the next few months we will be transitioning our customers to purchasing the SterilAmp product line, manufactured at our facility in Bozeman.

Please see table below for corresponding SterilAmp catalog numbers:

ProAmp Catalog #	SterilAmp Catalog #	Spore Population
PA-6-110NC	SA/6	10 <sup>6</sup> <i>Geobacillus stearothermophilus</i>
PA-5-110NC	SA/5	10 <sup>5</sup> <i>Geobacillus stearothermophilus</i>
NA	SA/4	10 <sup>4</sup> <i>Geobacillus stearothermophilus</i>
NA	SANC	Negative Controls – No spores present

We anticipate that this consolidation will occur in approximately 90 days. Please refer to the links from our web-site below for additional information comparing product specifications. Our customer service representatives are happy to assist you with additional information regarding this upcoming change at any time.
